The E-Rate program helps provide the tools that we need to keep our teachers, students, and parents connected to the ever expanding knowledge base. We are at a critical junction in the way we teach children, and E-Rate has helped us evolve by making digital tools affordable. Please do not cut funding for this program because we will lose the momentum that drives us toward a better public school system. The future success of our country will be built upon a better system of public education. The children and teachers of this nation more than deserve the support of the FCC. Please invest in our schools and our future!
